Prayer for Life Extension

Editorial

We are material body and Spirit. The Spirit is seen as aura around all living beings. When a person dies – the Spirit, which brings life to the body, leaves and there is no more aura to be seen. The lifeless material body, which is left, is a good-for-nothing empty shell that needs to be discarded. My lifelong studies of the aura found that the Spirit, seen as aura, is weak nonlinear electromagnetic field (NEMF). However, this weak field rules and regulates everything in the body not with its strength, but with the information it carries (being NEMF, it can imprint information).

When the Spirit leaves the material body, there is no more life energy, and the electrical impulses of the material body drop down to zero. The material body is pronounced dead, but the Spirit NEMF carry the life energy. Since the Spirit NEMF is informational field, the Spirit that left the body carries detailed information of the person's last lifetime (and also previous lifetimes as hypnotists, who put the Conscious to sleep to access the Subconscious, found) [1]. This makes death a transfer to a different form of energy existence – from material form to a Spiritual form.

Since the Spirit is weak informational field, it should be influenced by the info-energy of a prayer. If so, can we ask in prayer about life extension? Yes, we can. I did pray for my dying mother and she got 5 years of life extension, which allowed her to enjoy a grandson (my son). Here is the whole story. I was flying from Portugal to the city of Sofia, where I lived, when I got the telepathic message that my mother was very sick, and if I didn't go directly from Sofia to the city of Burgas, where she lived, I might not see her alive. (I always had telepathic connection with my mother and my son) [2].

I decided that as soon as I land in Sofia, I would go from International airlines to Domestic airlines and try to catch a plane flying to Burgas, and I did. I was lucky. Somebody was late for his flight and I jumped on his place. When I arrived, my mother asked me: "Who told you that I am sick? Did some of my neighbors call?" I said: "They couldn't have reach me because I was in Portugal, I am coming

directly from Portugal. I got telepathic message in the plane that you are very sick and I need to come directly here... and here I am [2]."

If I was not there my mother would have died. The next morning my mother said that as soon as she closed her eyes, she saw a big hand trying to suffocate her. I asked her to open her mouth – her throat was dark red and swollen. Obviously, she had allergic reaction to the antibiotic, which the doctor prescribed the previous day for her pneumonia. I called the doctor right away and asked him to come and give her another antibiotic, but to test it first to be sure there would be no allergic reaction to it. The doctor did, and we overcame the first crisis. However, there were more crises to come [2].

Three days after this, she got a combination of minor heart attack and minor stroke and she started retaining water. I called the doctor again and he prescribed: diuretic for getting rid of the retained water, and pills for the heart. Before I went to buy the prescribed medications, my mother was seeing the Spirits of her mother and her friend, and telling me they came to escort her. After I gave her the medications, and she went to the bathroom a few times, she said that it was not going to be today, it was going to be tomorrow [2].

The next day I did everything possible to have her accepted in a hospital, and when we arrived at the hospital, she was already unconscious. The doctor said they would do everything to bring her back to life, but it would depend on her would she pull back to life. I asked to be allowed to stay with her in the hospital promising that I would be helping everybody who needs help, and they allowed me. The doctor said I should give her oxygen only when she is unconscious, and as soon as she is conscious and sleeping to stop the oxygen because a lot of oxygen makes the lungs lazy [2].

It was midnight. My mother was conscious and sleeping and I stopped the oxygen. Looking at her profile, I was praying: "Oh, God, I cannot let her go now because she is the only close person I have. Maybe, later on when I will have somebody else in my life. Oh, God, I cannot let her go now!" At this moment, my mother started groaning. I asked her what is the problem, is she having pain? She said: "I am having a dream that I am trying to deliver you and I cannot separate you from myself. But why am I having this dream now?" I knew why she was having this dream now – it was because I was praying to God not to take her from me now when I didn't have anybody in my life but her [2].

After this prayer of mine, it was like God gave me what I was praying for. My mother stopped losing conscious, I stopped giving her oxygen, she slept calmly until the morning, and the crisis was over. Since my mother had some minor heart troubles and she needed to have somebody to take care of her, I took my mom to live with me, and she lived 5 more years. She died when my son was 1 year and 7 months old (so I was not alone). And she was happy to see a grandson – she always wanted to have a boy and she had three girls. The boy came with the next generation. In conclusion, I want to say that prayer for life extension works.
